

COMPANY PROFILE

Company

ATIB Magnetica is a division of ATIB Elettronica. ATIB Elettronica is one of the companies within the ATIB Group, a group of companies with more than 5 decades of experience in the field of mechanics, electronics and magnetic stuff.

Thanks to an experienced and passionate design team, ATIB Magnetica have specialized in the manufacturing of industrial electromagnets for the collection and handling of ferrous materials.

The expertise accumulated over the years in the field of material handling equipment allows ATIB Magnetica to deliver extremely practical, efficient and reliable magnetic attachments.

Growth through innovation

ATIB Magnetica is the result of the vision of ATIB Group Management Team, which strongly believes that the Group growth can only be achieved through innovation and development of new products.

A path that starts from the concrete and practical experience acquired over the years by all the staff within the ATIB Group. Each magnet is the result of the field experience, enthusiasm and expertise of all our people.

Production

Tradition and Technology are the key points of ATIB Magnetics production department. Modern robot welding machines together with human experience in winding, make ATIB Magnetics production department a fast and cost-effective strong point of the Company. Flexibility of production plans together with large inventory grant availability of magnets in very short times.

Service

Service is a key point in ATIB Magnetics world presence. Technical and spare parts service is available both centrally from headquarter and locally through dealer partners.

Product Range

ATIB Magnetics' range of industrial lifting magnets includes hydraulic electromagnets and electric circular magnets suitable for handling all types of scrap metal, as well as electronic magnets controller suitable for controlling all types of magnets. Innovation, quality and design are key features of ATIB Magnetics' electromagnets, which can be installed on machinery employed in demolition as well as in scrap and recycling sites.

ATIB MATERIAL HANDLING

ATIB srl is specialized in forklift attachments and masts. Since 1972 ATIB Material Handling offers practical and effective solutions to logistical problems, making goods handling faster and safer.

ATIB ELETTRONICA

ATIB Elettronica for more than 30 years has been leading in the production of industrial battery chargers, designed for traction batteries used on electric vehicles and aerial platforms, on the international level.

ATIB MAGNETICS

ATIB Magnetics is specialized in the manufacturing of industrial electromagnets for the collection and handling of ferrous materials.

ATIB ADVANCED SYSTEMS

ATIB Advanced Systems operates in the military sector providing accessories, lifters and lifting hooks manufactured in compliance with MIL standards or customized to suit the customer's needs.
